DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a memory device having MRAM cells, classified in class 365, subclass 158.
 - II. Claims 17-21, drawn to a system having a host including a main controller enclosed with a housing, classified in class 711.
 - III. Claims 22-23, drawn to a storage device with means for converting data in serial/parallel format, classified in class 365, subclass 219.
 - IV. Claims 24-26, drawn to a method for writing data to a magneto-resistive MRAM, classified in class 365, subclass 219.
 - V. Claims 27-29, drawn to a method for reading data from a MRAM, classified in class 365, subclass 219.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and IV, V are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of reading/writing in Inventions IV, V can be used with other memory types (i.e EEPROMs, SDRAMs, ...) than that MRAM claimed in Invention I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group IV, V; the search required for Group I is not required for Group II..., restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Christopher P. Kosh on 10/1/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T. Nguyen whose telephone number is (571) 272-1880. The examiner can normally be reached on Monday - Friday, 7:00 AM - 3:30 PM.
